

Looking for an internship?

At DT-Solutions we are happy to welcome a data science intern

The world is changing in a rapid phase. Safety is no longer guaranteed. With the disruptive Echo X technology, DT-Solutions aims to develop machines that contribute to the efficiency and safety of airports and other logistic hubs.

Do you dream about digits and coding? And looking for an internship, either as graduate or tag along during your studies: we offer a place to work on algorithm development. DTS is developing the software behind the Echo X technology to identify illicit materials behind barriers. The technology and innovative solutions can be incorporated in diverse industries and solutions.

You can work on our algorithm for the classification of Echo X spectra.

If you have a background in Electrotechnics/ Embedded systems, Mechatronics minor in Robotics and Vision Design, Technical Informatics, Applied Mathematics or Data Science, don't hesitate to reach out to Wil and we'll provide more information.

More info on the job? Mail info@solutions.com or call +316 19 81 19 38.
